INCIDENCIAS TÉCNICAS

· Problemas con diferentes Sistemas Operativos y programas

La realización del proyecto se ha dado desde dos sistemas operativos diferentes, Windows v

Ubuntu. También, se ha trabajado en él desde dos diferentes, IntelliJ y Eclipe.

En el inicio del proyecto cada integrante de este realizal a GitHub para poder trabajar siempre con el código má importar dicho código a nuestros ordenadores, se go causadas por la utilización de diferentes sistemas opera desorganización de carpetas, código no printa el resultar

Esta incidencia no solo se ha dado trabajando desde cla casa, ya que todos utilizamos diferentes sistemas ordenadores principales.

Descuadre de interfaz gráfica en distintos Sist

El hecho de trabajar en diferentes Sistemas Operativo gráficas de diferentes clases, como en la clase Rank trabajaron en Ubuntu y se descuadraron completamente

· Desaparición de imágenes en interfaz gráfica

RESUMEN JUEGO

AWSttle es un juego ambientado en el medievo el cual consiste en simular batallas entre personajes con distintas razas. Las razas que podemos elegir son:

- Humanos
- Elfos
- Enanos

Cada personaje tiene estas características:

- Nombre
- Puntos de
- FuerzaVelocidad
- Agilidad
- Defensa
- Arma (la c

Cuando iniciamos el juego nos aparecerá un menú cor personaje, elegir arma, ránking y salir del juego.

Es importante saber que no podremos iniciar una bat personaje y seguido su arma. Cabe destacar que hay cie por ciertas razas, y estas les aportaran mejoras al per fuerza.

Cuando ya hayamos escogido tanto el personaje como e la cual lucharemos contra un bot creado por el propio jue tanto nuestro personaje como el del bot con sus caract vida que le queda. El primero en atacar será el que ten tuvieran la misma serie el que tuviera mayor acilidad.
